Expertise:

Richard P. Goldberg, AIA, CSI, NCARB is an Architect and President of Professional Consultants International, an international building design and construction consulting company. Mr. Goldberg is a technical and forensic architect, responsible for managing and providing technical consultations to architects, contractors, building owners, product manufacturers, insurers, accountants and attorneys. He specializes in architectural practice issues and exterior building envelope systems, with sub-specialties in glass, concrete, ceramic tile, stone, terrazzo and masonry applications. Mr. Goldberg is involved in all phases of a building project, from research and design development, to construction monitoring, forensic investigations and litigation support.

Mr. Goldberg has over 26 years of architectural and construction industry experience. An Architect by training, Mr. Goldberg was in general private practice of architecture as a licensed architect prior to specialization as a technical and forensic architect. Prior to forming Professional Consultants International in 1999, Mr. Goldberg served as the Director of the Technical Service Division of Laticrete International, a manufacturer of products for the concrete, tile and stone industries.
