## **JAMES HARRINGTON, SR.**

James Harrington is a senior construction technician with Professional Consultants International, an international design and construction consulting company. Mr. Harrington specializes in floor and wall assembly construction incorporating ceramic tile, stone, brick masonry, terrazzo, resilient and concrete materials, and is responsible for providing field investigation, testing and quality assurance services to PROCON clients.

Mr. Harrington has over 35 years of experience in construction. Prior to joining PROCON in 2005, Mr. Harrington was responsible for construction project management at a regional ceramic and stone tile supplier and installation contractor. In addition to over 15 years hands-on experience as a tile and stone master mechanic, Mr. Harrington also has 5 years of sub-specialty experience in exterior façade ceramic tile installation, concrete, cement plaster, gunite, shotcrete, and waterproofing applications for pool and water feature construction.

Mr. Harrington is familiar with all phases of commercial floor and wall assembly construction project management, such as management and scheduling of work crews, standard project documentation practices, construction industry trade practices, and diagnostic testing.

Mr. Harrington is trained in specialized forensic and diagnostic field testing equipment and procedures. Mr. Harrington is also responsible for coordination of independent laboratory materials testing, including forensic petrographic and chemical testing.

Mr. Harrington is a former regional director of the National Tile Contractors Association (NTCA), and is also active in developing training seminars and apprentice training programs for NTCA.
